

Borders Workshop

Materials List

Your usual sewing stuff, including cutting mat and rotary cutter and ruler long enough for your fabric pieces

A machine will be required.

Fabric – you will need a square or rectangle to attach edgings to and fabric for the edgings. You can do this as a practice sampler using a 12” x 12” (plus or minus) square of fabric, or create a set of individual placemats.

Additional items/tools to bring:

freezer paper for drafting and cutting scallops, a curved ruler if you have one, Kay Buckley large circles are useful, or any rounded object you can use to draw circles for scallops (some tin cans may work, but you will need a diameter that works with the length of your edge). We will have some rulers with us to share
